### 1. Approval of report of previous working session

The report of the previous working session (#61) was reviewed during this session and has been approved. It will be added to GitHub.

### 2. Proposal for restructuring the working group

- Tjalle, Edwin and Bon prepared a proposal for a new meeting structure of the TOMP working group. The proposal can be found [here](#). The TOMP-API is mature and being used by more and more parties in the MaaS ecosystem. There are no immediate pressing issues to discuss in the Working Group, but there are a lot of things where we could exchange knowledge and information on.
- The working teams function independently and well and there seems no need to have a general update meeting every two weeks. It is therefore proposed to schedule a monthly meeting where we are able to dive deeper into a specific topic. For CDSM a similar approach is used with sessions on specific topics.
- The attending members of the working group agree to shift to a monthly meeting.
- A questionnaire will be sent to choose and prioritize specific topics to discuss during the monthly meetings: <https://forms.gle/G2Wr6pQ8Rmkho6LF6>
- The chair is still the TOMP WG representative in the Change Advisory Board. Next to that, the chair is in charge of the topics that will be discussed during the monthly meetings. The ministry of IenW is able to continue the operational support to prepare the meetings. (62.2)

### 3. Any other business

- Christian Cagnol joins WT4.
- The facilitate the SC every working team is asked to create a roadmap for 2022. (62.3)
- The topics of WT3 and WT4 are overlapping and therefore the meetings of the two working teams are merged.
- Ferdinand mentions that there is a call for digital EU data space mobility. Contact Ferdinand for more information.

**Next online meeting (working session #63) will be on Wednesday 23-3-2022, 10:00h**
