

### **Report of MaaS-API working group**

*27/03/2024, session #84  
12:00h-14:00h, Teleconference  
Chair: Tjalle*

---

#### **Attended by (12):**

Jelten Baguet (Mpact)  
Carl Fedlund (MobilityData)  
Eddy Borremans (Billinghouse)  
Tu-Tho Thai (ItxPT)  
Jef Heyse (Automicle)  
Meier Markus (CEN)  
Matthias Wirtz (Hacon)  
Peter van Brakel (9292)  
Ayse Öcal (NTM)  
Lukas Böhm (evemo)  
Gerrit Saey (Censys BV)  
Edwin van den Belt (Goudappel)

#### **Summary of decision points & feedback from actions from previous working session**

##### **1. Approval of report of previous working session**

The TOMP Working Group approves the report of the last meeting.

##### **2. Update International Home TOMP**

MaaS Alliance, has a European network. They are looking in to the possibility to set up an foundation for the TOMP home. 17th of April MaaS alliance will vote if they are willing to that.

##### **3. Payment**

Matthias tried to send an invite to discuss the payment suspect. But due to busy agenda's They decides to discusses this offline trough mail. Next meeting they will give an update.

##### **4. Update Working Teams**

- WT1 Technical issues

The WG are adding request for changes and new questions and issues are coming up every 2 weeks. The WG is still adding changes to 1.6, if they are not breaking updates. Currently there is no concrete date for the release of V1.6.1, it probably will be this year.

Edwin is working on V2.0, we need to be aware that some concept will be renamed due to the "Transmodel Vocabulary".

- WT2 Reference & Certification

- Eddy is not capable anymore to chair WG 2. From now on, Eddy suggests CAB updates instead of WT2 updates

Action: If somebody would like to chair WT 2 please let Eddy know.

- Update market consultation: Eddy and Ayse received a concept report. The general look on the TOMP is still positive. The results of TO are the most negative, mostly

because they are involved in the early age of TOMP in de Maas Pilots in the Netherlands. Eddy and Ayse asked KIENIA to search for more TO's that have not been involved in the MAAS pilots. Mid-April the official document will be released.

- WT3/4: Standards & Communications
  - NTM offered to help with the website.
  - Some TOMP WG members will be at the Intertraffic in Amsterdam. Great opportunity to meet each other.
  - Tjalle will give an TOMP presentation on the TU Berlin.
  - V1.5 compliant TOMP for dummies is almost finished. Edwin is looking for a platform to publish this.
  - Jelten is working on a post on Transmodel and there will be a post on Intertraffic as well.
  - Carl asked if they are any message from the TOMP WG which he can present.  
Action: Edwin will send Carl the slides he presented on the Autonomy congress.

## 5. Other items

- Carsharing update by Matthias

*TO Question:* Can we include all services on the MaaS Platform? This could greatly affect smaller transportation operators' monthly subscriptions.

*Roman's Question:* Are users interested in this offer? It might not be attractive to MaaS providers since it's mainly for big-city users. Is this more beneficial for transportation operators?

*Observation:* There's historically been a significant gap between MaaS providers and car-sharing operators.

Action: Matthias will reach out to Markus for further discussion.

- Slack Alternatives

The group decided that they will wait for the new "Home of the TOMP", they can possibly bring the slack environment with them. This point will be removed from the agenda.

## 6. Actionpoints

- Fabian, Carl, Matthias, and Tu-Tho will give an update next meeting on the GBFS & TOMP alignment.
- Edwin will reach out to Barry to help with the TOMP regarding on-demand transportation.
- Edwin will send Carl the slides he presented on the Autonomy congress.
- If anyone would like to chair WT 2, let Eddy know.
- Matthias will reach out to Markus for further discussion on the tariffs

The next online meeting (working session #85) will be held on the 24th of April 2024.
