Report of MaaS-API working group

26/04/2023, session #75
10:00h-12:00h, Teleconference

Attended by (11):
Eddy Borremans (Nazza)
Edwin van den Belt (Dat.mobility) - Chair
Ayse Öcal (NTM)
Tjalle Groen (Mpact)
Jelten Baguet (Mpact)
Markus Meijer (SBB)
Alberto Capponi (Nordcom)
Stefan de Konink (OpenGeo)
Paul Theyskens (MaaS Alliance)
Mitchel Smedts
Mobian Global

Summary of decision points & feedback from actions from previous working session
The following tasks were defined during the previous sessions:

No.	Context	Tasks	Status	Due date
70.1	Involve car-sharing operators and discuss progress on implementing TOMP-API	Bram will do his best to provide more details about which car-sharing operators are interested in using TOMP-API. Also, an update about which are using a third-party provider for their IT solution or the mobile app. Action: Tjalle will contact Bram for an update	To do	No deadline
74.1	NAPCORE WG seeks collaboration with the TOMP WG. NAPCORE had a discussion about booking APIs.	NAPCORE finds the TOMP-API overall useful for bookings, but there are cases that the API doesn't cover (for example tourist tickets). There is potential for a collaboration to cover this GAP.	To do	Next Meeting & following

		Action: Eddy didn't receive use cases from Anastasia yet. Edwin will contact Anastasia.		
74.1	Discussion about the alignment with CEN, Transmodel, OSDM.	Action: Impact assessment needs to be done for the TOMP WG when collaborating with CEN, Trans model, OSDM. Action: NTM will facilitate this. A meeting will be planned on the short term.	To do	Next Meeting & following

1. Supporting implementation

Presentation Edwin: Scenarios in the future
Action: The TOMP WG needs to see the impact analysis first before they can decide what the best option for the future will be.

Presentation Edwin: Europe & the big picture
There was a discussion about the tasks and responsibilities of a nap, different countries have different thoughts about this.
Action: It might be useful to take this discussion to the NAPCORE WG to compare it with other countries.

2. Update WT1 Technical issues

• Next meeting or before releasing V2.0, "paging & availability" needs to be discussed. For now, we will keep it as it is, but we have to decide if there will be any changes.
Tjalle came up with the idea to upload a post about this.

3. Update WT2 Reference implementation and certification

- Main focus is on the use cases for the potential TOMP V2. Eddy didn't receive use cases from Anastasia yet. Action: Edwin will contact Anastasia.
- NTM will help to get feedback from the implementers of TOMP
  and also from non-implementers. Eddy is working on this in the CAB.
  Action: the members of the working group will be involved later on to contact some Organisations to collect feedback.
- APDS cancelled the demo multiple times, Eddy and Edwin offered a ultimatum.

4. Update WT3/4 Standards and communication

- Currently the working team is small. Volunteers can contact Tjalle to join WT3/4
- Working on an interview. Eddy will be interviewed soon
- Collaborate to upload some logos on the website. To show who implemented TOMP.

5. Update WT6 Governance

- WT6 temporarily stopped. After the impact analysis is done, the working team can be activated again.

6. Other items

- Volunteers for the rotating chair for the general meeting can contact Ayse.

The next online meeting (working session #76) will be 7 June 2023.
